Agenda

01

Background

Background & motivation

Add a brief section overview

02

Method Design

Method & framework

Add a brief section overview

03

Results

Experiments & results

Add a brief section overview

04

Summary

Summary & outlook

Add a brief section overview

深圳河套學院
Shenzhen Loop Area Institute

01 Section Title

Summarize this section in one sentence.

Slide Title

CONTENT WITH FIGURE

1 Key Point 1

State the main point in one or two sentences.
Keep it concise and focus on the key message.

2 Key Point 2

Add evidence, observations or motivation.
Cite sources or highlight key terms as needed.

3 Key Point 3

Link the figure to the research question.
Avoid overcrowding the slide with text.

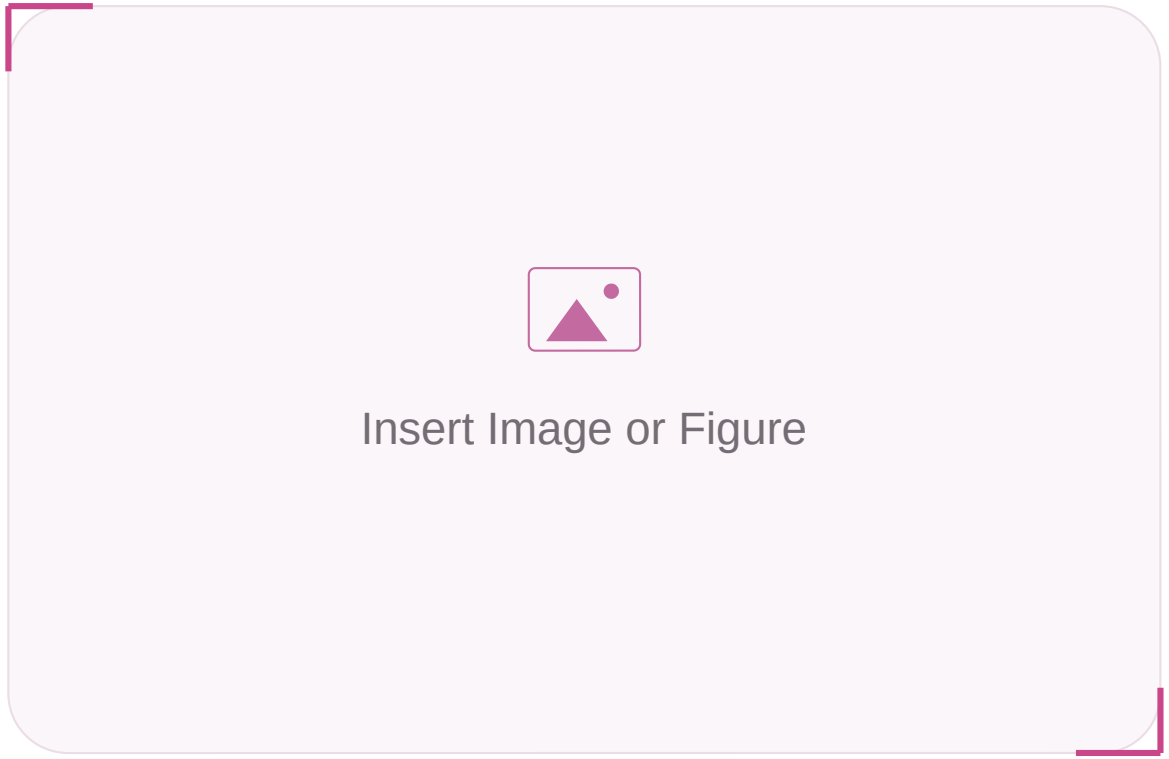

Figure 1. Add a caption or source

Method Framework

EDITABLE WORKFLOW

Outline the approach: input, processing, decision and output.

01

Input

Data, observations, interaction

02

Perception

Features, states, representations

03

Reasoning

Policies, rules, planning

04

Output

Actions, results, feedback

Method highlight: describe the key improvement over existing approaches.

Approach Comparison

TWO-COLUMN COMPARISON

Approach A

Baseline / Existing approach

- Core idea: describe the main design.
- Strengths: list two key advantages.
- Use cases: note conditions and limitations.

Approach B

Proposed / Alternative approach

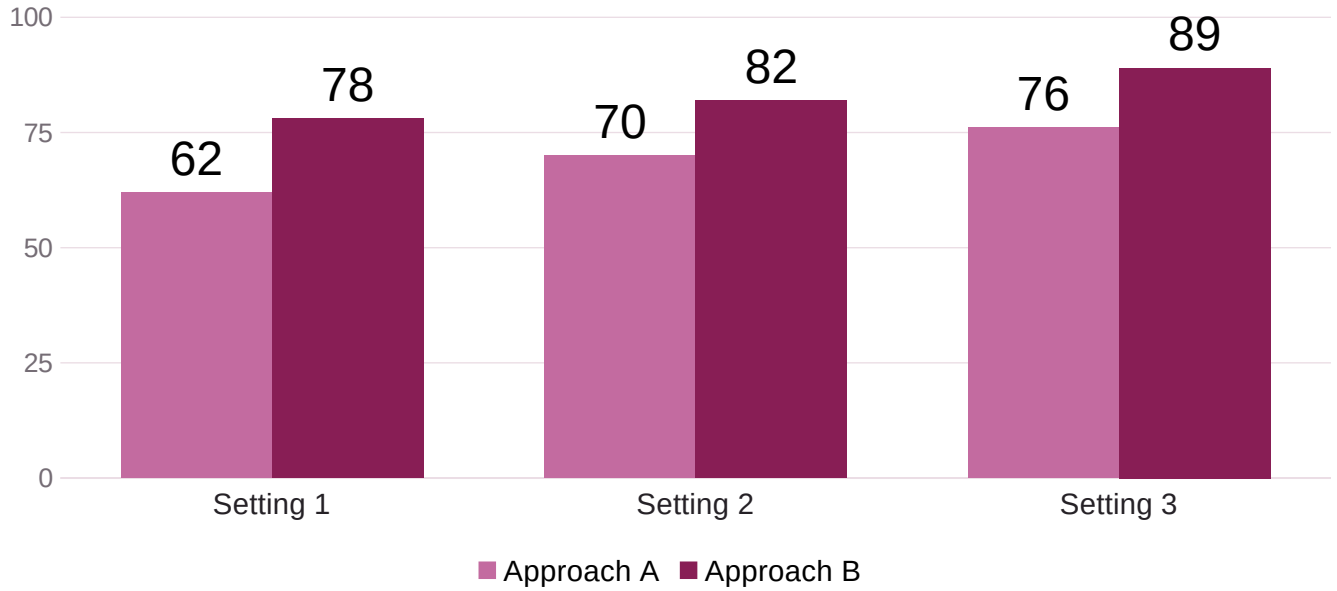

- Core idea: describe the main design.
- Strengths: list two key advantages.
- Use cases: note conditions and limitations.

Takeaway: state the key difference between the two approaches.

Experimental Results

EDITABLE CHART & KEY FINDINGS

Chart Title

Illustrative data only; replace with actual results.

Key Findings

XX.X% — **Key Metric**

Explain the metric or result.

−XX% — **Relative Change**

State the gain and reference.

X.X × — **Efficiency Gain**

Note conditions or limitations.

Benchmark Comparison

EDITABLE DATA TABLE

Table 1. Add the experimental setup and comparison details

Method	Metric A ↑	Metric B ↑	Latency ↓	Notes
Baseline A	—	—	—	Baseline
Baseline B	—	—	—	Baseline
Variant A	—	—	—	Ablation
Variant B	—	—	—	Ablation
Our method	**—**	**—**	**—**	**Proposed**

Note: ↑ higher is better; ↓ lower is better. Adapt to your metrics.

Research Roadmap

EDITABLE TIMELINE

Outline the goals and key milestones for the next phase.

Phase 01

Problem Setup

[Time Frame]

Define the problem and evaluation goals.

Phase 02

Validation

[Time Frame]

Build a prototype and run initial tests.

Phase 03

Evaluation

[Time Frame]

Compare baselines and extend the analysis.

Phase 04

Reporting

[Time Frame]

Consolidate results and prepare the report.

Summary & Outlook

KEY TAKEAWAYS & NEXT STEPS

State the key conclusion in one sentence.

01

Contributions

Summarize the core contributions and the problems they address.

02

Key Findings

Highlight the main findings and their implications.

03

Future Work

Outline remaining limitations and the next research steps.

Colors & Usage Guide

STYLE GUIDE · DELETE BEFORE PRESENTING

COLOR 1	COLOR 2	COLOR 3	COLOR 4
#C36BA0	#B8444B	#C9468A	#881E55
RGB 195 107 160	RGB 184 68 75	RGB 201 70 138	RGB 136 30 85

Edit Content	Titles, text, workflows, tables and ribbons are native objects; the logo is an image.
Edit Charts	Right-click the chart on slide 7 → Edit Data. All values are illustrative.
Reuse Slides	Duplicate slides and replace the content. The theme uses the four colors shown here.
Fonts & Size	16:9 widescreen; English text uses Arial. Replace fonts if any characters are missing.

Unofficial template. For personal, non-commercial use only.
