# 01 Background & Motivation

Add a one-sentence overview of this section

# Background, Motivation & Research Scope

## Background & Motivation

Introduce the research topic, context and applications.
Explain current limitations and the need for this study.

## Objectives & Scope

Outline the key problem this study aims to address.
Organize by objectives, approach and expected outcomes.

**Key question: State the problem in one sentence.**

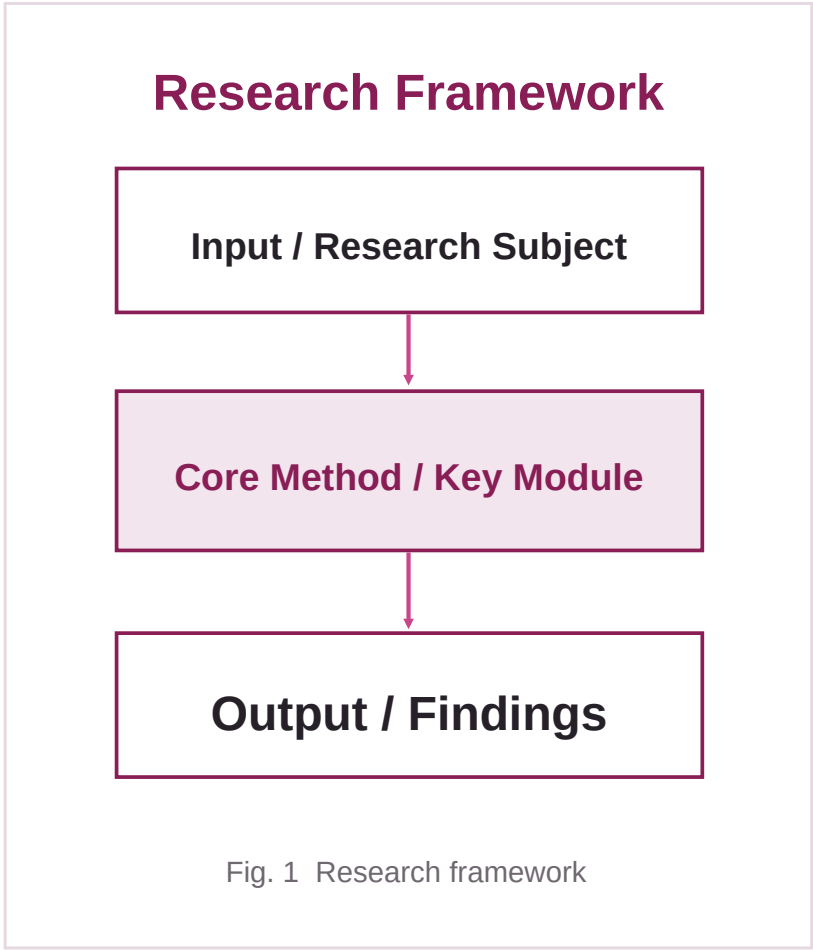

Fig. 1 Research framework

# Problem Definition & Motivation

## Enter Slide Subtitle

### Problem Definition

Define inputs, outputs and assumptions.
Set clear boundaries; keep one problem per slide.

### Limitations of Existing Methods

Summarize key limitations in two or three sentences.
Use examples, comparisons or practical needs.

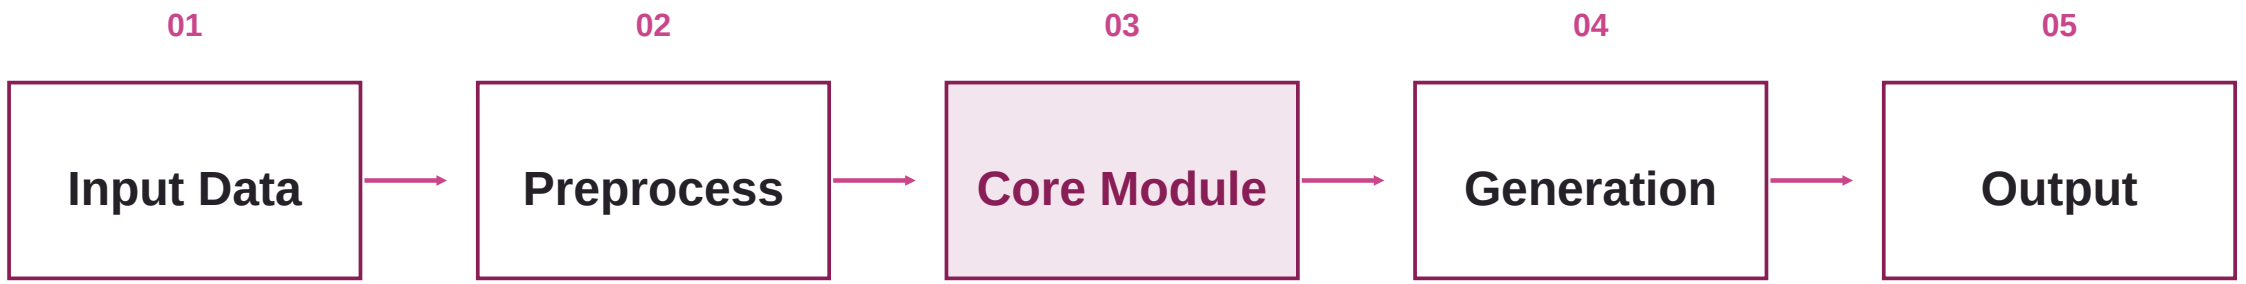

Diagram / Photo / Screenshot

Replace this placeholder; keep the original aspect ratio

Fig. 2 Enter image caption

# Method & Framework

Outline the approach. All process boxes, arrows and text below are editable.

### Module 1: Input & Processing

Describe data sources and formats and required preprocessing steps.

### Module 2: Core Method

Explain key mechanisms, design choices and innovations.

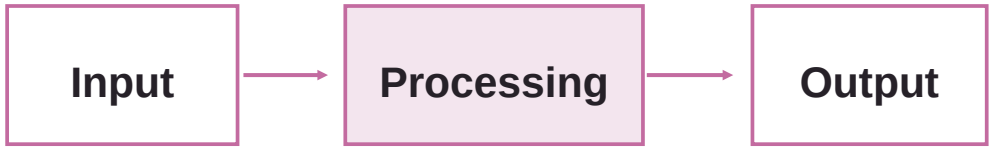

### Module 3: Output & Evaluation

Describe outputs, evaluation and relevance to the target task.

# Method Comparison

## Approach A / Baseline

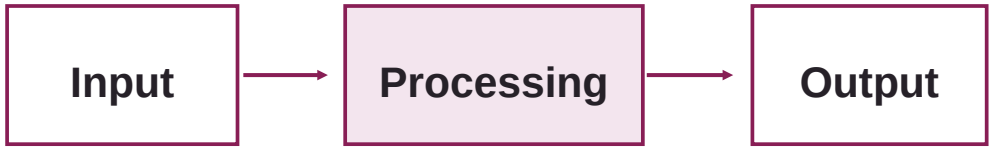

Describe the approach and use cases.
Highlight differences from the other approach.

Key strengths: Summarize the advantages.
Scope: State assumptions and limitations.

## Approach B / Proposed Method

Describe the approach and use cases.
Highlight differences from the other approach.

Key strengths: Summarize the advantages.
Scope: State assumptions and limitations.

# Experiments & Results

## Results: Text + Editable Chart

### Experimental Setup

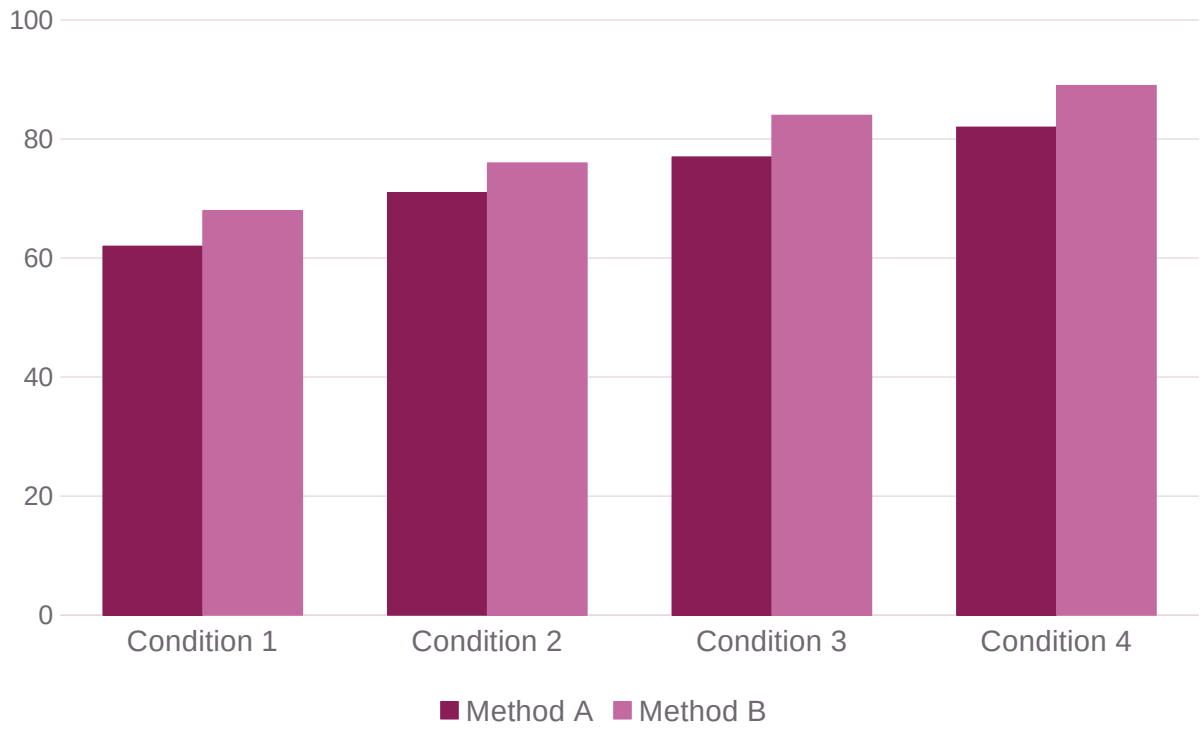

Describe data, baselines, metrics and conditions.
Replace the sample data with actual results.

### Key Findings

Highlight one or two key observations and state supported conclusions and their scope.

| Metric 1 | Metric 2 | Notes |
|---|---|---|
| — | — | To be filled |

### Results Across Conditions

Sample data for layout only. Right-click chart → Edit Data.

# Results & Comparative Analysis

## Two-Chart Comparison

### Experiment 1: Trends

Describe variables, metrics and key observations.

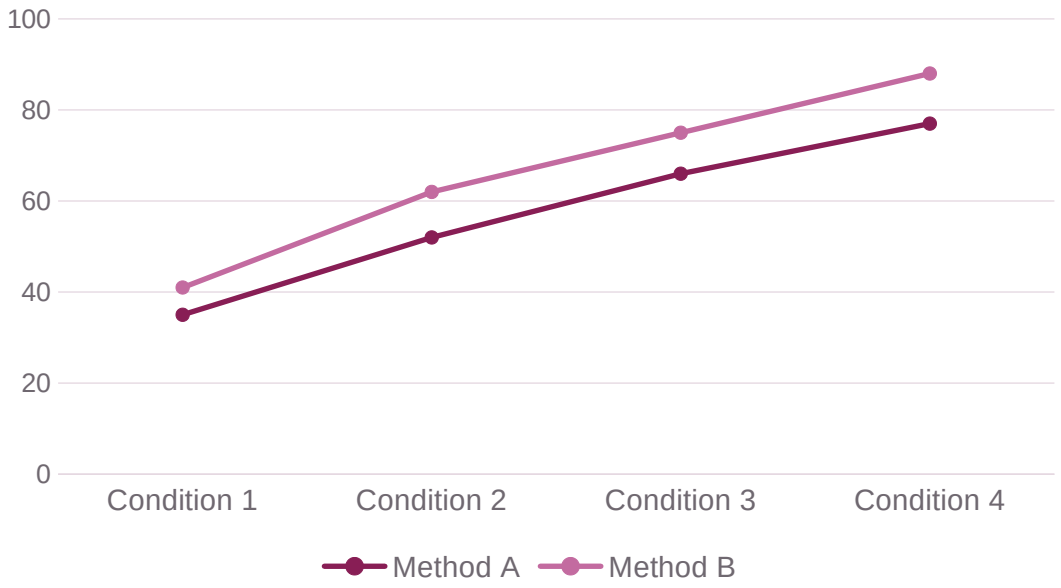

Fig. 3 Trend comparison (sample data)

### Experiment 2: Methods

Describe methods, settings and key observations.

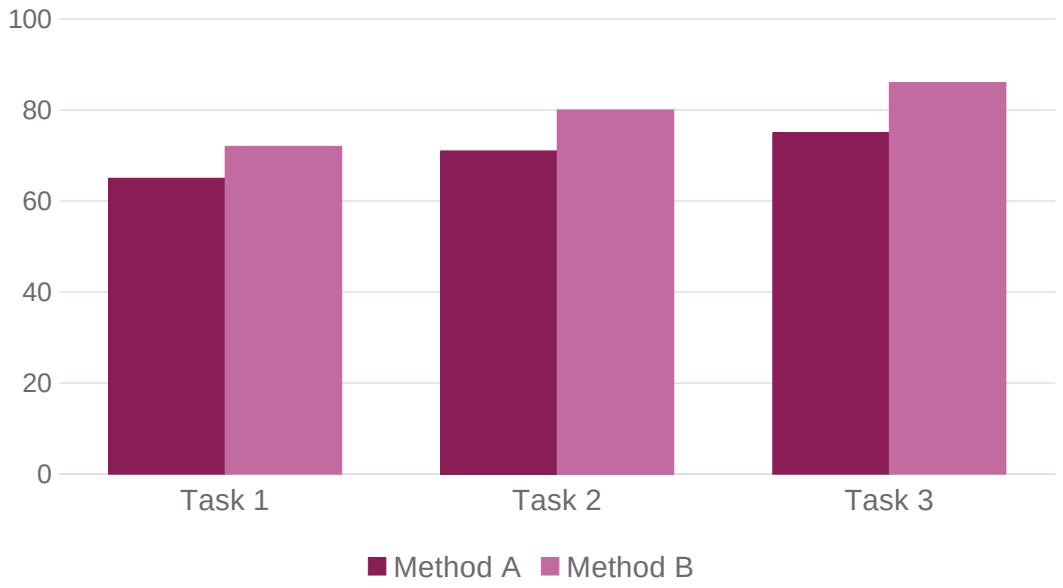

Fig. 4 Method comparison (sample data)

# System Demo & Case Studies

Describe the context, demonstration or key observation in one sentence.

Insert Screenshot / Result Image / Video Thumbnail

Keep the original aspect ratio. Add a demo via Insert → Video

Fig. 5  Enter case description, data source or experimental conditions

# Key Metrics & Comparisons

## Table 1  Enter table title

| Model / Method | Metric 1 ↑ | Metric 2 ↑ | Latency ↓ | Notes |
|---|---|---|---|---|
| Method A | — | — | — | To be filled |
| Method B | — | — | — | To be filled |
| Method C | — | — | — | To be filled |
| Ablation | — | — | — | To be filled |
| **Ours** | **—** | **—** | **—** | **To be filled** |

Note: Specify units, statistics and evaluation settings. ↑ / ↓ indicates the preferred direction; adjust as needed.

**Key takeaway: State the most important finding in one sentence.**

# Summary & Outlook

## Research Summary

### 01 Research Problem

Summarize the research problem, objectives and application context.

### 02 Method & Contributions

Summarize the design, key innovations and implementation approach.

### 03 Experiments & Conclusions

Summarize findings and conclusions, including scope and limitations.

# Summary & Outlook

## Future Work

1. **Research Extensions**

   Describe further research questions or application areas.

2. **Method Improvements**

   Identify modules, mechanisms or theory to improve.

3. **Further Validation**

   Outline plans for more data, comparisons and validation.

4. **Applications & Next Steps**

   Describe applications, timelines or milestones.
