ACADEMIC PRESENTATION

# Your Research Title Here

[Research Topic / Presentation Subtitle]

Presenter

[Name]

Affiliation

[Lab / Center]

Date

[YYYY.MM.DD]

# Agenda

From the research question to methods, evidence and next steps.

| | | |
|---|---|---|
| 01 | **Context & Problem** | Motivation, challenges and goals |
| 02 | **Method & Design** | Framework, modules and comparisons |
| 03 | **Results & Findings** | Setup, results and analysis |
| 04 | **Summary & Outlook** | Contributions, limitations and next steps |

01

# Section Title

State the research question this section addresses.

# Context & Research Question

**State the central problem this research addresses.**

KEY QUESTION

[Enter a testable research question]

01

## Context

Describe the setting and need. Cite key sources.

02

## Research Gap

Identify what existing methods leave unresolved.

03

## Research Goal

Define the problem and the criteria for success.

# Figure & Discussion

Figure 1. [Caption and source]

## Observation

Describe the key pattern shown in the figure.

## Interpretation

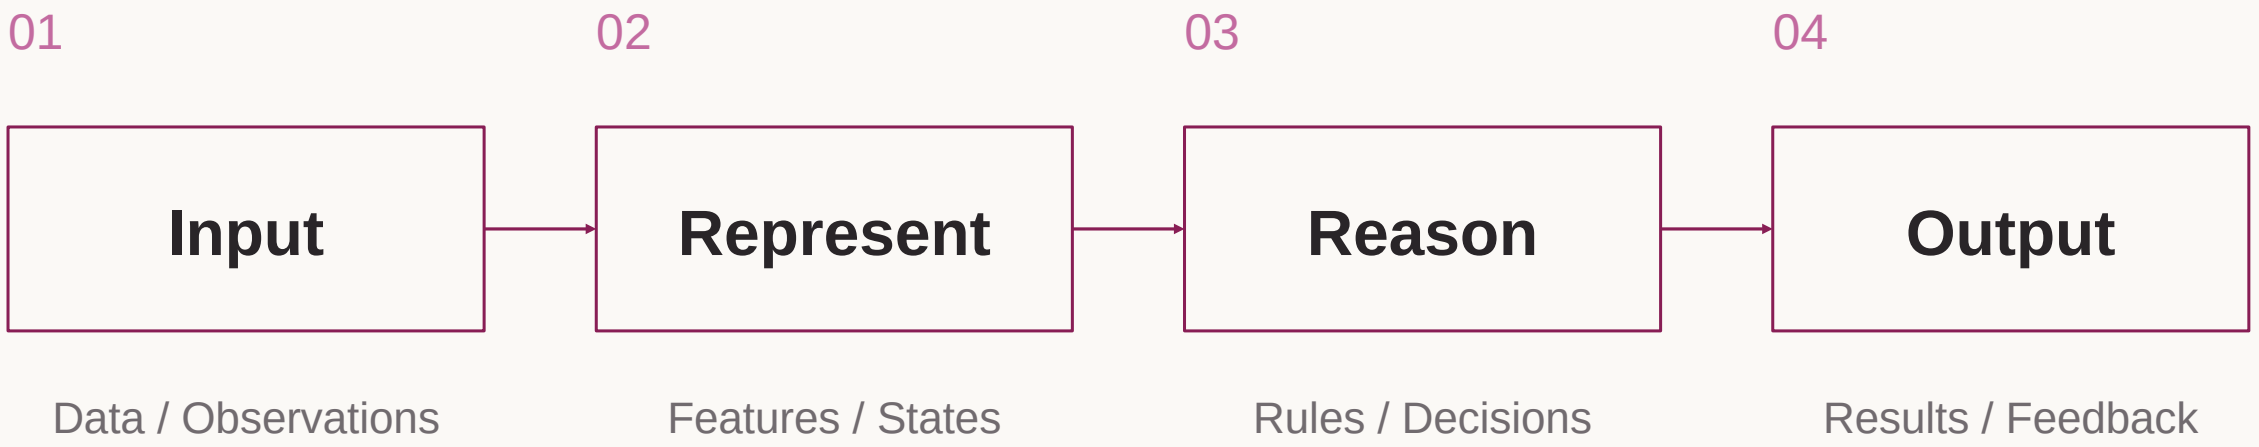

Connect the pattern to the research question.

## Scope

Note conditions, limitations or open questions.

# Method Framework

Outline how the method transforms inputs into outputs.

**KEY DESIGN** [Describe the core module and its rationale]

# Method Comparison

## Approach A

[Existing Method / Baseline]

Core idea: [outline the main design]

Strengths: [state the key advantages]

Scope: [note conditions and limitations]

## Approach B

[Proposed Method / Alternative]

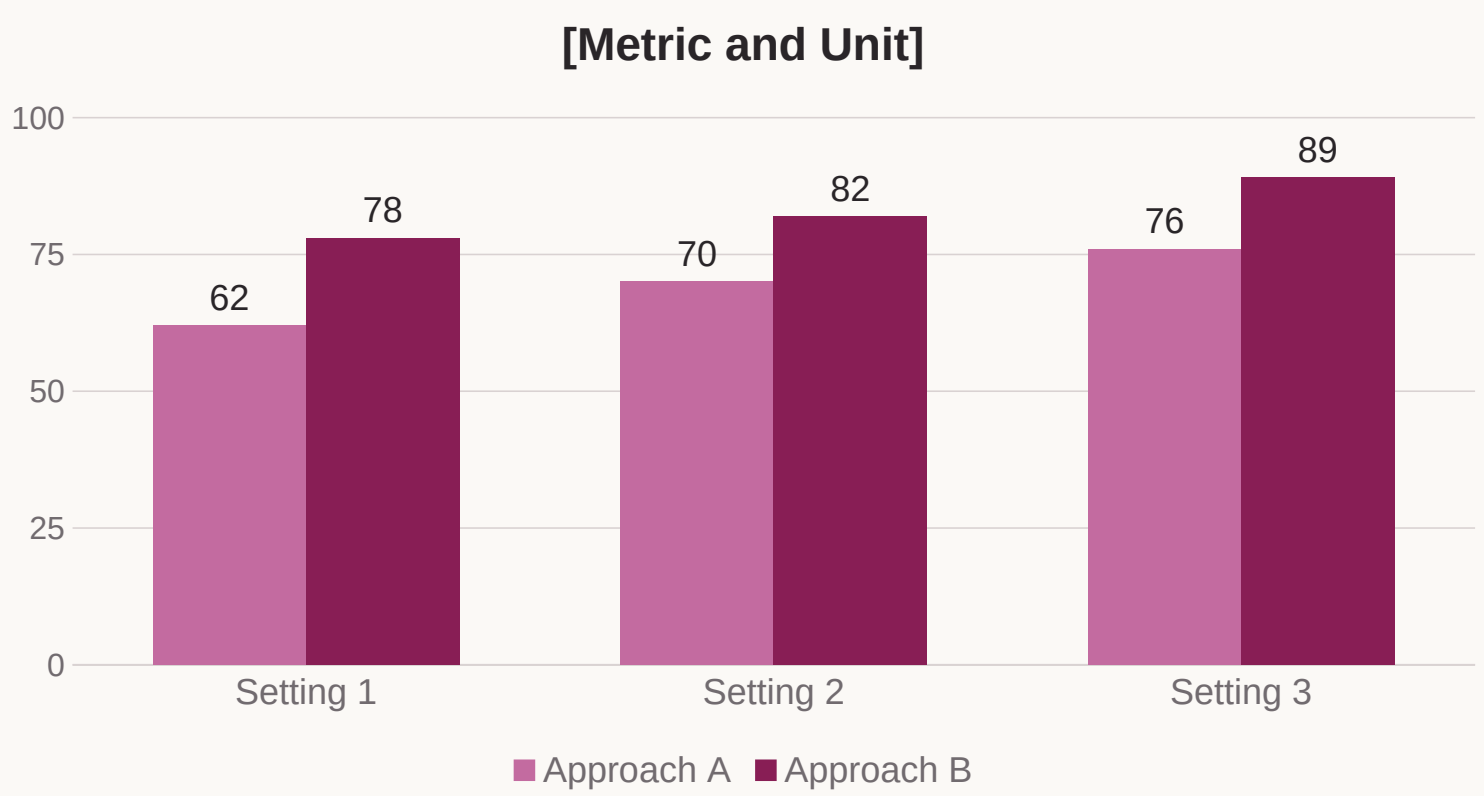

Core idea: [outline the main design]

Strengths: [state the key advantages]

Scope: [note conditions and limitations]

[State the most important difference between the two methods]

# Experimental Results

Illustrative data only. Replace with actual research results.

## Reading the Results

### Main Finding

[State the conclusion supported by the results]

### Comparison

[Describe the baseline and test conditions]

### Uncertainty

[Report error, repetitions or limitations]

# Benchmark Comparison

Table 1. [Setup, dataset and evaluation details]

| Method | Metric A ↑ | Metric B ↑ | Latency ↓ | Notes |
|---|---|---|---|---|
| Baseline A | — | — | — | Baseline |
| Baseline B | — | — | — | Baseline |
| Variant A | — | — | — | Ablation |
| Variant B | — | — | — | Ablation |
| **Our Method** | **—** | **—** | **—** | **Proposed** |

↑ Higher is better; ↓ lower is better. Fill in the dashes and specify units.

# Research Roadmap

Define the next goals, milestones and deliverables.

| | | | |
|---|---|---|---|
| 01 | **Define** | [Time Frame] | Define scope and evaluation goals. |
| 02 | **Validate** | [Time Frame] | Build a prototype and run initial tests. |
| 03 | **Evaluate** | [Time Frame] | Compare baselines and analyze. |
| 04 | **Report** | [Time Frame] | Summarize results in a report. |

# Summary & Outlook

**[State the key conclusion in one sentence]**

01 **Contributions**

Summarize the problem and key contributions.

02 **Limitations**

Clarify the scope of the evidence and the method.

03 **Future Work**

Identify what to test or improve next.

# References

Use a consistent citation style and complete, verifiable sources.

[1] [Authors]. [Paper Title]. [Journal / Conference], [Year]. [DOI / Link].

[2] [Authors]. [Paper Title]. [Journal / Conference], [Year]. [DOI / Link].

[3] [Organization / Authors]. [Dataset or Project]. [Version / Year]. [Link].

[4] [Authors]. [Other Reference]. [Source], [Year]. [Link].

Placeholders illustrate the citation format. Replace with actual references.

# Thank You

## Questions & Discussion

**Edit Content** Replace bracketed placeholders. Duplicate the layouts you need.

**Edit Data** Right-click the chart on slide 8 → Edit Data. Slide 9 is a native table.

**Keep It Open** Focus on one theme per slide. Reduce text and leave room for figures.

**Fonts & Format** 16:9 widescreen. English text and numbers use Arial.

Unofficial custom template. Logo and brand colors follow the supplied visual guide. Sample data do not represent actual research results.
